Past Experiences:

Since 2020, we have supported OST Inc. with their Commonwealth of PA IT Staff Augmentation MSP program, providing recruiting and staffing services for IT Staffing positions throughout participating agencies in the Commonwealth.

Highlighted Projects:

UI/UX Design Manager for Pennsylvania Fish & Boat Commission

Pennsylvania Fish & Boat Commission needed an experienced UI/UX consultant with project management experience to evaluate system interfaces and determine the feasibility of requested enhancements.

We brought in an experienced UI/UX Design Manager who acted as the lead resource for evaluating the website and mobile interface designs, conducting meetings to solicit and document feedback from internal stakeholders, working with vendors to evaluate UI enhancement options, and tracking approved enhancements.

Network Infrastructure Engineer for Pennsylvania Department of Transportation

Pennsylvania Department of Transportation needed an expert Network Infrastructure Engineer to assist in the highest level of network planning and long-term vision for the agency's delivery center's network and security infrastructure.

We brought in an experienced Network Infrastructure Engineer who performed Network Management functions utilizing various industry tools to monitor, test, verify, troubleshoot, and resolve complex Delivery Center network problems by working with users and service providers.

DevOps Project Manager for Pennsylvania Department of Education

Pennsylvania Department of Education needed an experienced IT Project Manager who had experience with Microsoft DevOps solutions.

We brought in a skilled Project Manager to manage the agency's technology projects and other Project Managers and serve as the primary point of contact for all project-related issues, including the resolution of issues.

Technical Support Analyst for Pennsylvania Department of Transportation

Pennsylvania Department of Transportation needed tech support analysts to take calls and help people with computer logins, resets and assistance getting through applications and escalating tickets.

We brought in multiple consultants to analyze and troubleshoot business application support problems, ascertain the nature of the problem, use technical databases to research problems and also to assist in the coordination of changes, upgrades and new products, ensuring systems will operate correctly in the current and future environment.
